

**Open one 4-year PhD contract (FPI)
in LIA group – UPM**

- **Predoctoral contract FPI** associated with a synthetic microbiology + artificial intelligence project: We seek (bio-)engineers with passion for research, with strong programming abilities, and with knowledge of artificial intelligence techniques that want to design/model/simulate smart living drugs and apply computational techniques to understand complex microbial ecosystems (with an application in reverse engineering microbiota and probiotic design).
- **Project title:** “Hacia la Inteligencia Artificial in vivo: programación de fármacos multicelulares vivos inteligentes”.
- **Project code:** PID2019-106960GB-I00
- **Principal Investigator:** Alfonso Rodríguez-Patón. arpaton@fi.upm.es
- **Grupo de Inteligencia artificial (LIA - UPM):** www.lia.upm.es
- **Deadline:** October 27, 2020.
- **Information about the call and online application:**
